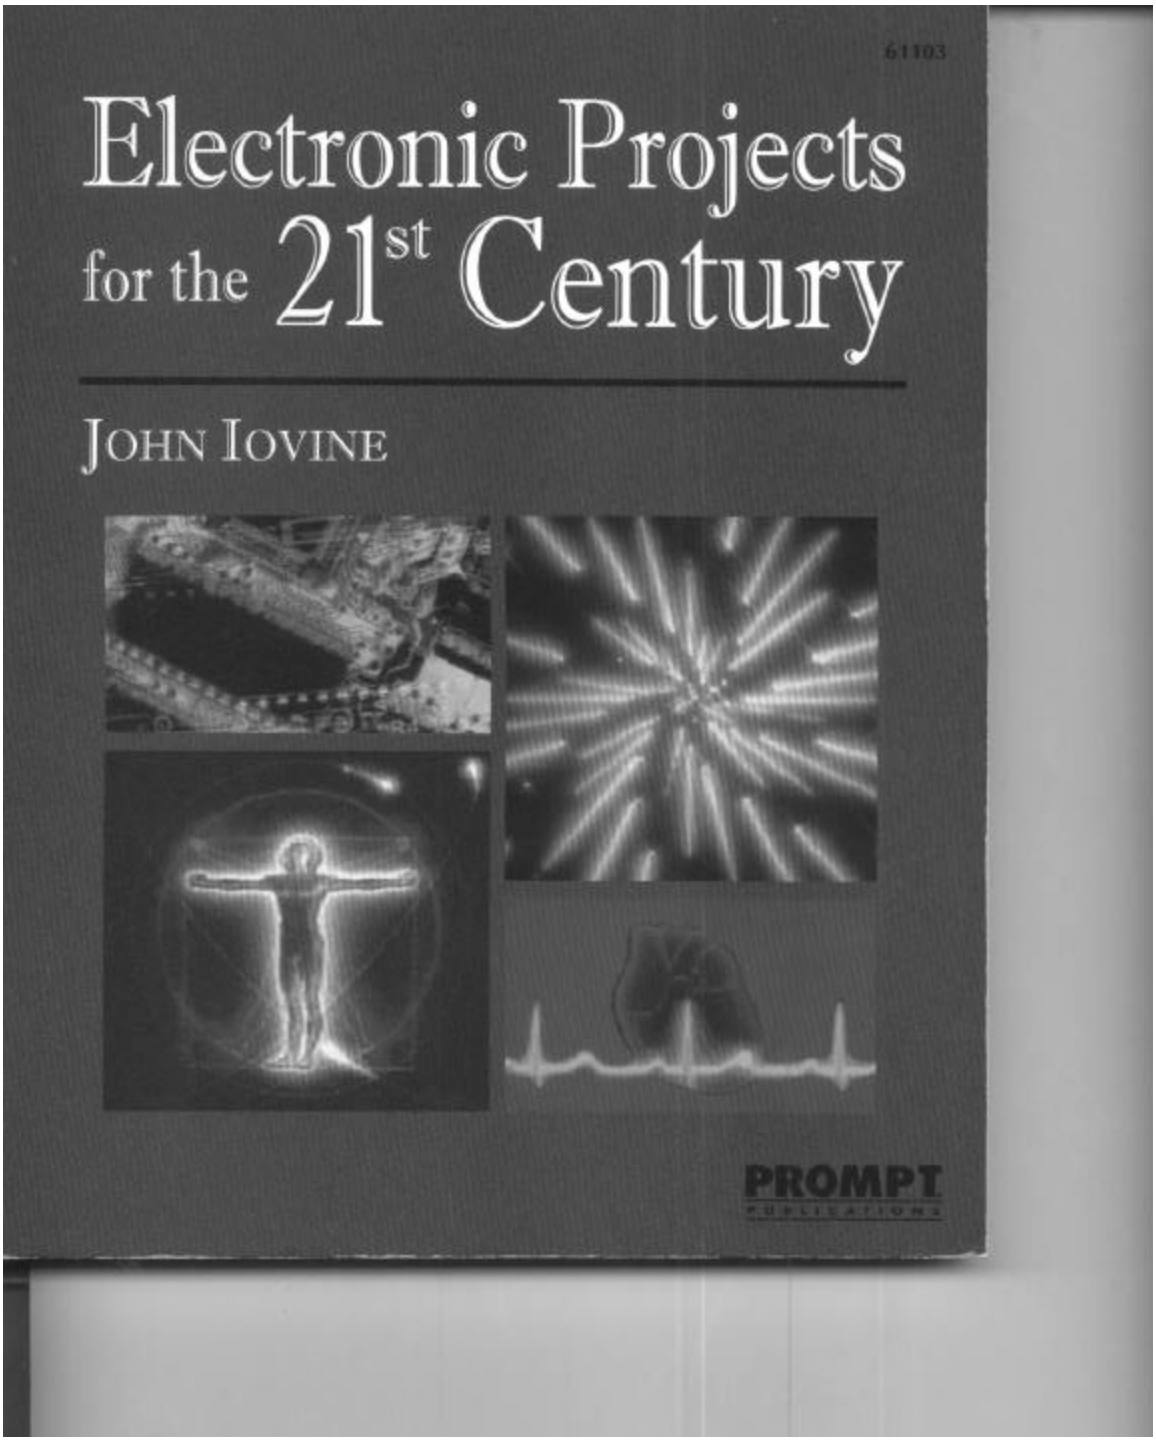
Jameco Part number 145461



Jameco Part number

TABLE OF CONTENTS

CHAPTER 1
RECOMBINANT DNA EXPERIMENT **13**
Human Genome Project 14
Biotechnology 101 14
Genes 15
Nucleic Acids 16
Double Helix 17
Protein Synthesis 19
The Genetic Code 20
Transfer RNA (tRNA) 21
Ribosomal RNA (rRNA) 22
Clones 22
Genetic Manipulation by Viruses 23
First Step Toward Genetic Engineering 24
Recombinant DNA 25
Putting Recombinant DNA to Work 26
Restriction Endonuclease Enzymes 26
Making E. coli Competent 27
Plasmid Vector 28
Gene Splicing Experiment 29
OverView 30
98.6°F Incubator 31
107.6°F Water Bath 32
Simple Procedures 32
Starter Plate 32
Ligation of DNA 34
Transform E. coli with Recombinant DNA 35
Plating the Results 38
Results 39
CHAPTER 2
GENETIC EVOLUTION **41**
Procedures 42
Experiment 1 42

Experiment 2 44
Experiment 3 45
Results 45
Evolution and Sex 46

CHAPTER 3
NEGATIVE ION GENERATOR 47
Ion Effect 48
Additional Research 48
Positive Effects 49
Asthma 49
Sports 50
No Health Benefits Claimed 50
Susceptibility 50
Ion Generator 51
Research Projects 53
Plant Growth Stimulation 53
Improved Gas Mileage 53
Swimming Pools 54

CHAPTER 4
BIO-FEEDBACK & LIE DETECTOR DEVICE 55
Circuit Description 56
Bio-Feedback Section 57
Electrodes 57
Circuit Construction 59
Circuit Operation 59
Bio-Feedback 60
Lie Detector 60

CHAPTER 5
ELF MONITOR 63
Why Wasn't It Sooner 64
The Real Deal 65
The Evidence 66
Not All the News is Bad 67
Computer Monitors 67
Tale of the Tape 68
Shielding 69
Precautions Around the Home 70
Television 71
VDT 71
Fluorescent Lights 72
Electric Clocks 72
Hair Dryers 72
Electric Heaters 72

Bottom Line 73
ELF Sensor 73
Monitor 74
Construction 74
Troubleshooting 76
Using the ELF Monitor 76

CHAPTER 6
HYDROPHONE 79
Hydrophone Specifications 80
Audio Amplifier 80
Use 81

CHAPTER 7
GEIGER COUNTER 85
Radioactivity 85
Background Radiation 86
History 87
Measurement Of Radioactivity 88
Geiger Tube 88
The Circuit 90
Construction 91
Radioactive Sources 93
Check-Out & Troubleshooting 93
Other Geiger Tubes 94
Inverse Square Law 95
Detecting Solar Flares 95

CHAPTER 8
MHD GENERATOR 97
MHD Basics 97
Making a Plasma 98
Advantages of MHD Generators 98
MHD Model 99
Operation 101
Improving The MHD Generator 101
Liquid Metal MHD 102
MHD Propulsion 102
How MHD Propulsion Works 102
MHD Propulsion In Space 103

CHAPTER 9
PLASMA ACOUSTICS 105
Basic Operation 106
How it Works 106
Experimenting with Plasma Acoustics 107

Improving The Design 108
Other Experiments 108

CHAPTER 10
EXPANSION CLOUD CHAMBER 111
Construction 111
Use 113

CHAPTER 11
NITINOL-SHAPED MEMORY ALLOY 115
History 116
Applications 116
How it Works 117
Properties 118
Wire Diameter 119
Activating Nitinol Wire 119
Direct Electric Heating 119
Pulse Width Modulation Heating 120
Circuit 120
Nitinol Demonstration 121
Use 123
2nd Demonstration Model 123
Going Further 124

CHAPTER 12
AIR POLLUTION MONITOR 127
Semiconductor Sensor 127
Gases Detected by Sensor 128
Future Sensors 129
Sensor Characteristics 130
Test Circuit 131
Simple Air Pollution Monitor 132
Going Further 134

CHAPTER 13
NEURAL NETWORKS 137
Why Neural Nets 137
Biological Neurons 138
Human Brain 139
In The Beginning 140
Models 141
Computer Modeling 142
Electronic Neurons 142
Sun Tracker Neural Circuit 143
Other Uses 146

Jameco Part number 145461

CHAPTER 14
INTRODUCTION TO STEPPER MOTORS **149**
Basic Operations 150
Resolution 151
Half Step 151
Other Types of Stepper Motors 152
Real World 153
Test Circuit 153
Stepper Motors 156
Test Circuit Demo 158
Troubleshooting 158
Going Further 159

CHAPTER 15
EQUATORIAL CAMERA MOUNT FOR ASTROPHOTOGRAPHY **161**
Construction 163
Camera Arm 164
The Circuit 165
Flexible Shaft 168
Battery 170
Use 170
Another Way to Use the Mount 172
Film Speed & Aperture 172
Light Pollution 173
Homemade Light Pollution Filters 173

CHAPTER 16
HOLOGRAPHY **175**
Holography Versus Photography 176
Redundancy 179
Two Types 179
Lasers 179
Laser Light 180
Laser Power Supply 181
How the Supply Works 182
Connecting the Power Supply to the Laser 183
Testing & Calibrating the Laser Power Supply 184
Laser Tube Housing 185
Laser Safety 187

CHAPTER 17
HOLOGRAPHY II **189**
Where to Shoot 189
Isolation Table 190
Optical Components & Mounts 191
Securing Optical Components 192

Film and Film Plate Holder 193
Safelight 194
Shooting Your First Hologram 194
Choosing an Object 194
Making the Exposure 196
Developing Your Hologram 196
Viewing Your Hologram 198
Real and Virtual Images 199
Troubleshooting 201
Hints & Tips 202
One More For the Road 202

CHAPTER 18
KIRLIAN PHOTOGRAPHY 205
Short History 205
Usefulness 206
Debunking the Myths 206
Cold Electron Emission 207
Circuit Operation 207
Circuit Construction 208
Exposure Plate 210
Making the Exposure Plate 210
Mounting the Plate 211
Exposures 211
Film 212
Shielded Film 213

CHAPTER 19
PINHOLE PHOTOGRAPHY 215
History of Pinhole Optics 215
Pinhole Camera 216
The Pinhole 218
f-Stop 219
Making Your Pinhole 219
Finishing the Camera 220
Pinhole Darkroom 220
Loading the Camera 221
Exposure 221
Simple Development 223
The Paper Negative 224
Going Further 226

CHAPTER 20
OIL AND GAS FROM COAL 227
Synthetic Gasoline & Oil 228
Making Fuel Gas from Coal 228

Buying Coal 230
Caution 230
Making Synthetic Gas & Oil from Coal 230
Second Method For Producing Synthetic Gas 232
Going Further 232

CHAPTER 21
ALCOHOL FUEL PRODUCTION 233
Sugar Concentration, pH & Temperature 234
Reaction Vessel 234
Fermentation Lock 235
Step 1 236
Fermentation 236
Distillation 237
Step 2 238
Fuel Grade 238
Using Fuel Grade Alcohol 239
2-Cycle Engines 239
U.S. Government Regulations 239
Bio-Gas 241
Generation 241

CHAPTER 22
BIO-GAS COMPOSITION 242
Plant Fertilizer 242
Anaerobic Fermentation 243
Temperature 243
Acidity 243
Carbon to Nitrogen Ratio 243
Test Experiment 244
Going Further 245

CHAPTER 23
WOOD AS FUEL 247
Experimental Gas Generator 248

APPENDIX A
Suppliers Index 251

WORKS CITED 252

INDEX 253

Jameco Part number 145461

INTRODUCTION

Sometimes people ask where do I get my ideas for projects to write about. My answer is simple, I write what I would like to read. This book contains such science experiments.

The projects in this book touch upon technologies that have far reaching implications in the future, such as the recombinant DNA, genetic evolution and holography projects. Other projects apply old technology to new problems such as waste disposal, conservation, recycling and energy generation illustrated in the bio-gas, coal gasification, alcohol fuel production and wood experiments.

The experiments provide you with a beginning into exciting areas of science. It is left to you, if you choose, to blaze your own trail.
